ABOUT ME

Recent MSc graduate in Data Science & FinTech with strong experience in machine learning, data analysis, and software development. Skilled in Python, SQL, and building predictive models. Passionate about developing data-driven solutions and AI-based applications.

WORK EXPERIENCE

March 2026 - July 2026

Data Scientist Intern | Creditsafe France

- Preprocessed and analyzed large datasets to improve data quality and usability
- Developed predictive models such as CatBoost, XGBoost, and Random Forest
- Evaluated model performance and optimized accuracy for business use cases

July 2022 - August 2022

Web Developer | YLN Developpment

- Built and maintained web applications using JavaScript, PHP, and REST APIs
- Developed frontend interfaces with HTML, CSS, JavaScript
- Integrated backend services and improved system functionality

EDUCATION

2024-2026

MSc Data Science & FinTech | University of Rennes & University of Trento

Focused on machine learning, data analysis, and high-performance computing. Applied techniques such as clustering, predictive modeling, and data processing using Python (Pandas, NumPy, scikit-learn) and SQL. Plus financial courses including the use of Bloomberg terminal.

2021-2024

BSc Computer Sciences | University of Poitiers

Built strong foundations in programming, algorithms, and software development, including object-oriented programming, full-stack development, and database systems.

SKILLS

- | | | |
|--------------|-------------|------------------------|
| • Python | • Git | • Bloomberg Terminal |
| • C | • REST APIs | • Finance Fundamentals |
| • Java | • Bash | |
| • Applied ML | | |
